NEW RESEARCH IN THE VALLEY OF THE KINGS

©Basel University, U Bickel, P. M. Kacicnik.

Discover recently uncovered tombs in the Valley of the Kings with renowned Egyptologist Professor Susanne Bickel, the 2015 Janet Gale Visiting Fellow at the Australian Centre for Egyptology, Macquarie University.

Saturday 1 August
Methodist Ladies' College
Lee Auditorium | 2-4pm
Coffee and tea will be served after the lecture.

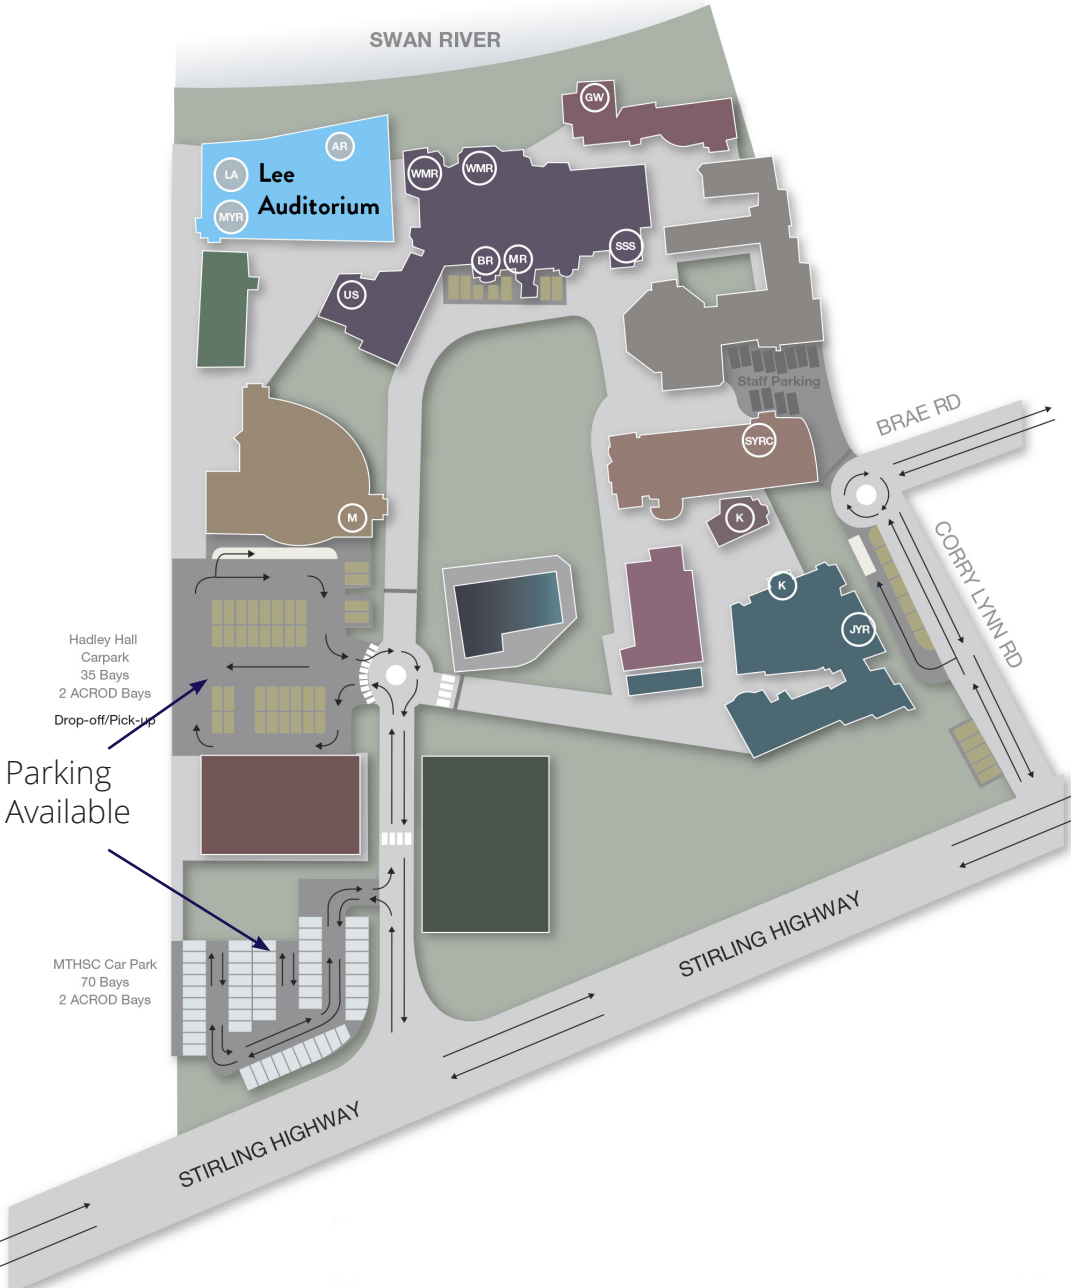

Professor Bickel is the director of the University of Basel's Kings' Valley Project and, in cooperation with the Egyptian Ministry of Antiquities, has been excavating the site since 2011.

She will deliver a free lecture on her work in Egypt and present some of her amazing discoveries, including the discovery of a new tomb. Analysis of thousands of fragments from burial equipment found in KV 40 yield precious insights into the long and manifold history of the Valley, including the discovery of more than 30 so far unknown individuals from the personal entourage of King Amenhotep III.

Seating is limited. Bookings are essential.

All enquiries should be directed to Jodie Ford at jford@mlc.wa.edu.au
